

Education Can't Wait

The world is not okay.

Hunger

Climate Change

Unemployment

Poverty

As we face these today, we are also passing these problems on to our children, the next generation.

If we can't solve all the problems, then we must at least enable our children to be equipped for the future.

Children need education and a little bit more to become socially responsible citizens.

Children of today need continuous exposure to personal values & life skills.

Children, the decision makers, the trendsetters, the radicalists of tomorrow **will need** a positive mindset.

Especially children from not-so privileged communities.

Our mission is to be the unwavering support system for every child and its ecosystem that we work with to help them grow into – a happy, independent and responsible contributing members of society.

We believe, when we are able to do this for every child

We will be able to realise our vision of –

**Future-proofing
the next generation,
today.**

🔊 **Future-proof**

Verb

–to.....

Project KEYtaab is operational in

2 Schools, 10 Shelter Homes,

3 Community Centres

catering **1500 Children.**

Project KEYtaab

Our flagship project caters to children from Grade 1 to 10. It emphasises three key aspects of child development -

academics, social emotional learning & mental well being. After successfully

running this project as an afterschool program for over four years, we are now expanding it to schools across India, backed by strong proof of concept.

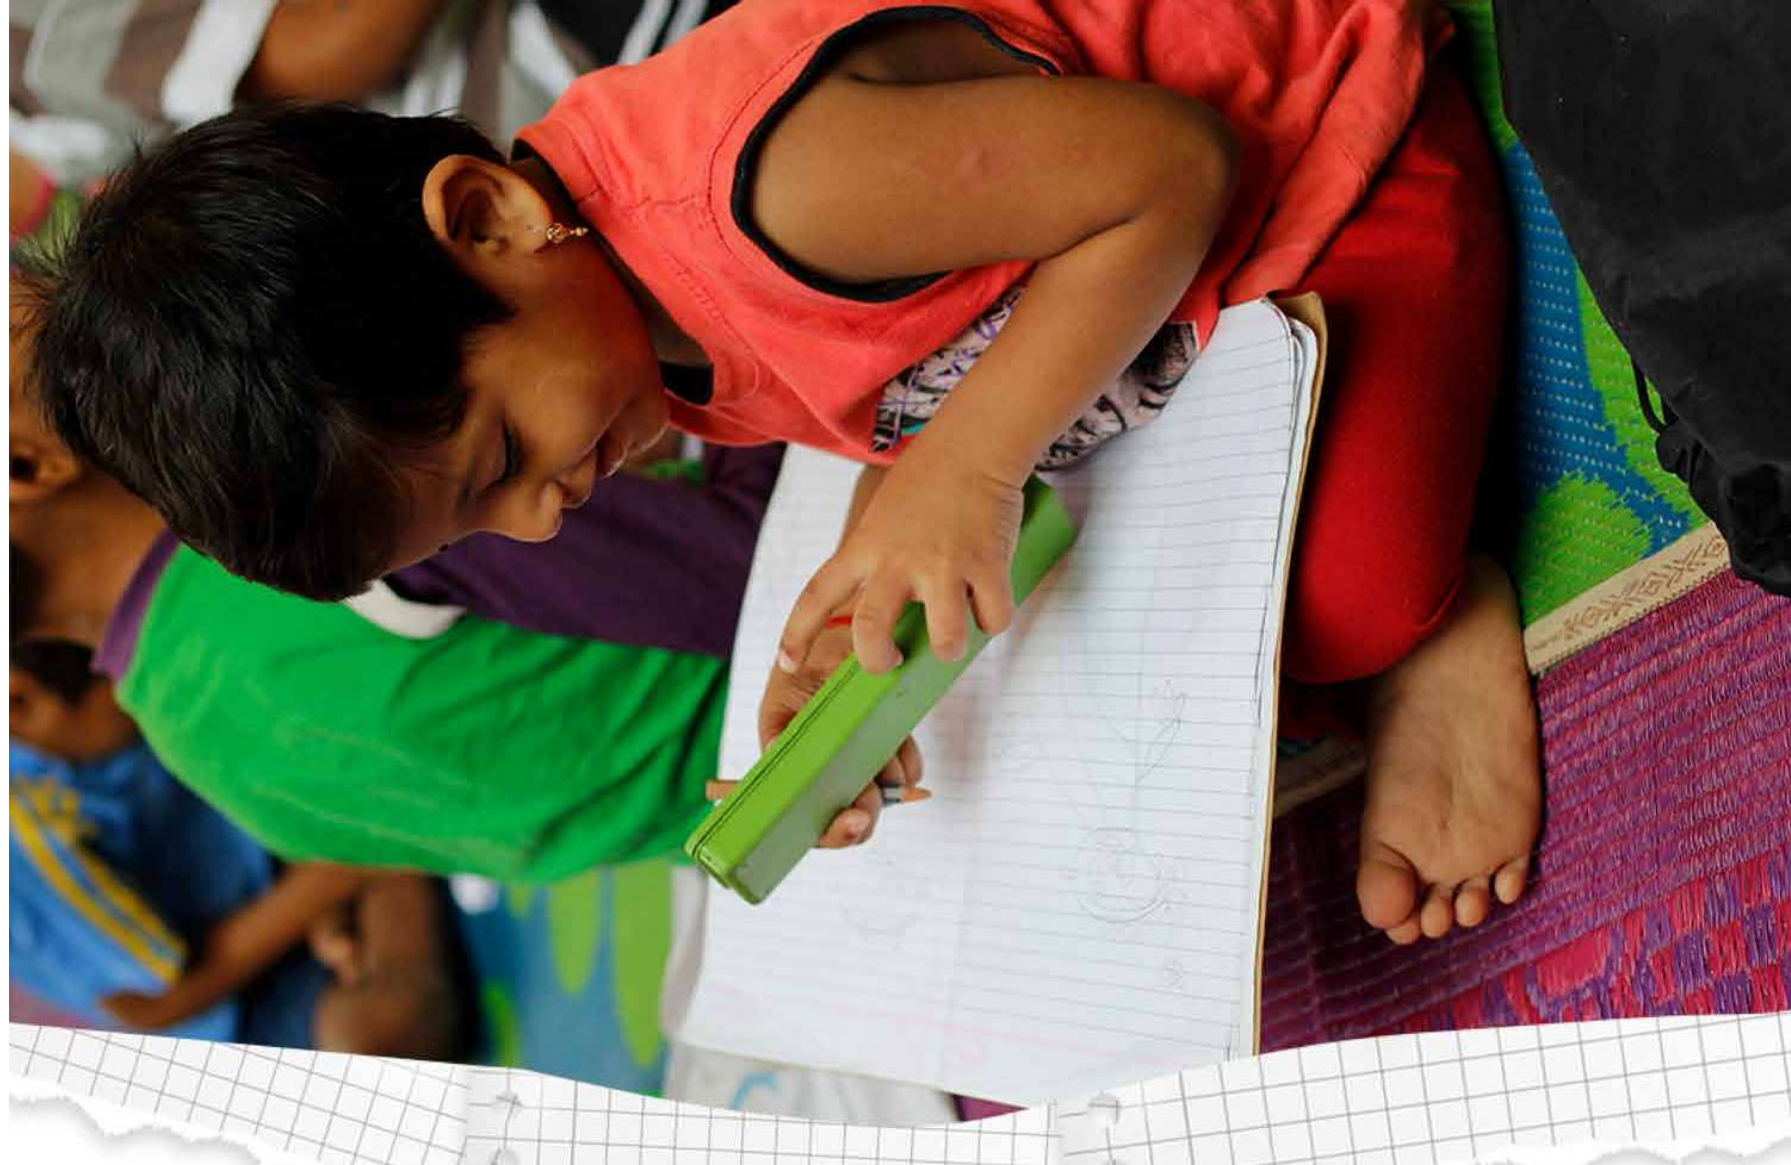

Project Keytaab Focuses On

3 PILLARS of Child Development

**Experiential
Academic Learning**

**Social Emotional
Learning**

Mental Well Being

Experiential Academic Learning

The 2 KEY ASPECTS of the first pillar are:

Remedial Learning

Strengthening foundational literacy and numeracy skills.

Experiential Learning

Building conceptual knowledge over rote learning by engaging children in live projects & experiments

Social Emotional Learning

Life Skills Training

Equipping children with life skills such as critical thinking, communication, decision making.

Ingraining Values

Instilling essential values such as discipline, hard work, and mutual respect for oneself and others.

Mental Well-Being

We ensure proper mental well being of our children by having implemented

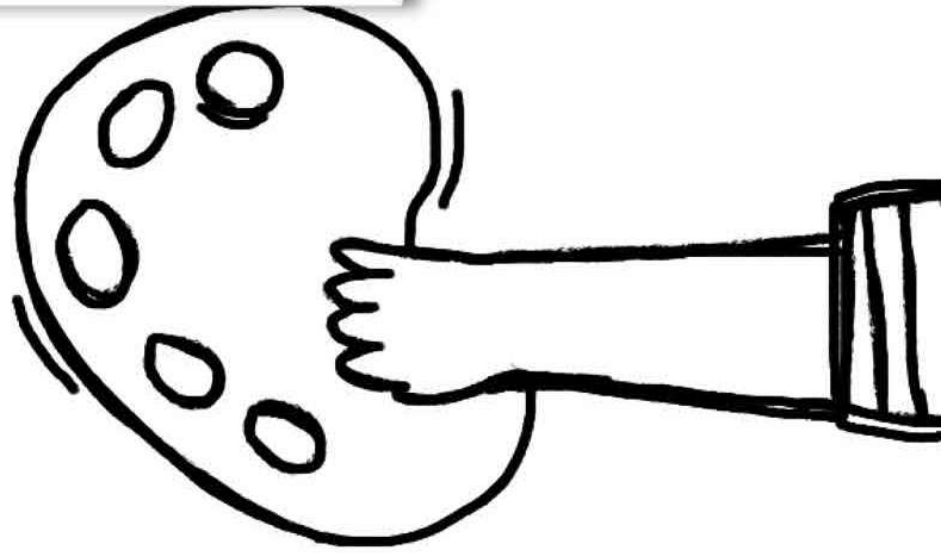

Safe Space Protocol

A mandate ensuring every child feels secure, supported, and respected, upheld by our teachers.

First Responder Training

Working on remedial measures with teachers and parents/guardians through regular check-ins, while also monitoring children's behavioural patterns.

Muskurahat came across **100 youth care-leavers in Kolhapur who lost their jobs in the lockdown**. Post the program, **78% of the participants secured jobs** by themselves while the rest chose to continue their education.

Project Saarthi

started as an emergency Covid-19 response project in July 2020 has now evolved into a full-fledged career readiness program for the youth. We identify and secure career pathways aligned with their interests and current job trends. We also work on developing crucial work skills and work ethics.

Every society needs individuals **who will bring** change.

Individuals **who can identify** right from wrong.

Individuals **who will take** necessary **actions** to cope & evolve better.

Education helps shape such individuals.

Our ambitions are to shape
our children into such individuals.

And thus, we say !

Education Can't Wait
